

I'm publishing **6 MEP mobile apps** to Google Play, built for detailers and field engineers. Before they can go live, Google requires **12 testers to opt in for 14 days**. All you need is an Android phone and a Google account. Scan any QR code below, tap "Become a tester," and install. **The apps are free during testing.**

Pipe Schematic Pro

\$4.99 at launch

Draw pipe schematics with angle snapping, fitting library, and auto Bill of Materials. Cartesian or isometric grid.

Interactive Ductulator

\$2.99 at launch

Size rectangular, round, and oval duct simultaneously. Enter CFM, velocity, or friction loss and solve the rest.

Point Load Calculator

\$2.99 at launch

Drag and drop up to 10 point loads on an interactive beam. Hanger reactions calculated automatically with self-weight.

Offset3D

\$4.99 at launch

See your rolling offset in 3D. Travel, cut length, and fitting takeouts in one tap. Supports weld, threaded, socket, and grooved.

StairBuilder

\$2.99 at launch

Design code-compliant stairs in seconds. IBC, IRC, and ADA checks with 3D preview and auto Bill of Materials.

MEP Toolkit

\$7.99 at launch

All three core tools in one app: Ductulator, Point Load Calculator, and Pipe Schematic Pro. One purchase, no subscriptions.

HOW TO JOIN (TAKES 2 MINUTES)

- 1 Scan the QR code** for any app above with your Android phone's camera.
- 2 Tap "Become a tester"** on the Google Play page that opens. Sign in with your Google account if prompted.
- 3 Install the app** from the Play Store link that appears. That's it. Use it, break it, let me know what you think.

IMPORTANT: Send me your Google account email first. I have to add you to the approved tester list before the QR codes will work. Without that step, the Play Store will show the app as unavailable. This is the email tied to the Google Play Store on your Android phone (Gmail or Google Workspace). Email me at **jergrif73@gmail.com** and I'll get you added right away.
